GitHub: https://github.com/copperwiring

I am a machine learning engineer engineer with experience in computer vision based applications.
In past I was a graduate research (Masters) at Simon Fraser University, Canada. I have worked with
semi-supervised learning and class-imbalance problems. I have experience in implementing machine learning
algorithms at scale.

SKILLSET

Software: MATLAB, Octave
Languages and Tools: PyTorch, TensorFlow, Python, Numpy, Scipy, OpenCV, Matplotlib, Docker as well as AWS cloud services like S3, EC2 and Amazon Sagemaker

EDUCATION

Master of Applied Science (Computer Vision)
Simon Fraser University, Canada, January 2021   CGPA: 3.92/4.33
Bachelor of Technology, Electronics and Communication
Uttar Pradesh Technical University, India, June 2016

PROJECTS

RGB-Depth Based Occlusion Aware Target Re-detection Video :
- Implemented target re-detection long term tracker using Kinect RGB-D camera.
- Tracker was able to infer & track target with information provided only in first frame.
- Improved average precision by almost 50% as compared to baseline KCF tracker

Deep Attention Models for Human Tracking Using RGBD l Paper :
- Worked in a team of 4 to develop an adaptive appearance model to accurately detect color camouflage, even in the presence of complex natural objects.
- Improved the accuracy by approximately 50% and reduced the type I error by 23% and type II error by 5%.

Celestini Project India:
- At Samsung IoT Lab, developed a prototype video analytic algorithm using Caltech pedestrian dataset to run on Raspberry Pi 3 Model B.
- Worked in a team of 2 where I was responsible for porting the code from MATLAB to Octave. Also, worked on pre-processing the data to clean images, remove noise to infer position, lane and density of vehicles in front of the camera.

Prototype Landslide Risk Communication System Paper :
- Developed a system which forecasts and communicates occurrence of landslides.
- Conducted field survey and implemented a system for sensor deployment (sensors, microcontroller boards, GSM module and other electical components).

EXPERIENCE

Machine Learning Engineer   (currently working)
Cubic Farms, Canada
- Research, develop, and implement ML algorithms into a variety of data ingestion sources for imagery data and IoT data
- Design and implement ML models that scale to thousands of machines Also package tests, build containers and deploy artifacts in CI/CD pipelines

Machine Learning Consultant   July 2021-August 2021
Coastal Resource Mapping, Canada

- Computed and analyzed vegetation index for plant health from aerial raster data.

- Worked on a data pipeline leveraging Deep Convolutional Neural Network (CNN) to segment individual plants in orthomosaic raster imagery.

- Worked on plan detection for high-value crops that need to be monitored at the resolution of individual plants

Machine Learning Researcher   February 2021-June 2021
MILA, Montreal, Canada

- Worked on large scale time-series dataset in the order of millions of data.

- Implemented and scaled data pre-processing to run on cloud; cleaned data into standardized format.

- Tested data for ordinal classification problem for data modelling and processing geospatial (satellite) data.

Machine Learning Intern   February 2020-August 2020
UrtheCast, Vancouver, Canada

- Individually implemented machine learning system for satellite data (Landsat8, SPARCS, Sentinel 2 dataset) for multi-class prediction of cloud, shadow, and haze.

- Implemented data ingestion pipeline which takes in raw geospatial multi-dimensional data as input and converts it into standardized format.

- Scaled the algorithm using AWS cloud based services, example, EC2 for deployment server, S3 for data storage and docker for creating virtual environment and parallel deployment of multiple training jobs.

- Investigated and implemented optimization methods to improve cloud mask generation from S2 data using the Green, Red Edge, and Water Vapor band.

Graduate Research Assistant   January 2018-February 2021
Networked Robotics and Sensing Laboratory
School of Applied Science, Simon Fraser University, Canada

Project Associate   August 2017-October 2017
Helicopter and VTOL Laboratory
Indian Institute of Technology Kanpur, India

Computer Vision & IoT Developer   June 2016-July 2017
Samsung IoT Innovation Lab, Delhi, India
& Applied Cognitive Science Lab, India
